

I am particularly concerned about the genetic engineering of sterile seeds - poor farmers count on this year's crop to yield the seeds for next year's.

Dear Commissioner Henney,

I urge you to keep genetically engineered food out of the food supply until:

- Independent safety testing demonstrates genetically engineered crops have no harmful effect on human health or the environment.
- Genetically engineered crops are labeled to ensure the consumer's right to know.
- The corporations that manufacture these crops are held liable for any harm.
